

PHASE 2 QUALIFIED

U.S. Environmental Protection Agency Wood-burning Fireplace Program

Phase 2 Qualified retrofit devices installed in fireplaces can reduce smoke. Exposure to smoke has been associated with respiratory illness and other health problems. Fireplaces that have lower smoke emissions may reduce your risk.

RETROFIT DEVICE SMOKE EMISSIONS RANGE

Fireplaces with lower emissions produce less smoke when installed and operated properly.

MANUFACTURER: **Healthy Hearth LLC**

MODEL NAME: **PureFire (HEARTHCAT)**

SMOKE (PARTICLE EMISSIONS): **4.8 GRAMS / KG OF WOOD BURNED**

As tested on the Craftsman 36 (28.25" x 21" x 16"), results may vary for other fireplaces. EPA has determined, based on testing by an accredited independent laboratory, that this retrofit device qualifies at the Phase 2 emissions level for U.S. EPA's Voluntary Fireplace Program.
